Test Summary Report

Project: Task Management Web Application
Version: 1.0
Report Date: March 3, 2026
Prepared By: Umar Maaz

---

1. Introduction

This report summarizes the testing activities performed on the Task Management Web Application. The application is a responsive task management tool built with pure HTML, CSS, and JavaScript, featuring role-based access (Admin/User), task CRUD operations, local storage persistence, and a modern UI. The goal of this testing cycle was to validate all functional and non-functional requirements as defined in the project specification.

---

2. Scope of Testing

Testing covered the following areas:

- **Login & Authentication** – UI validation, successful/failed login, demo credentials, responsiveness.
- **Dashboard Layout** – Sidebar menus based on role, top navbar, task summary cards, responsive behavior.
- **Task Management** – Table display, status badges, action buttons visibility (role-based), search and filter.
- **Create/Edit Modal** – Field validation, pre-fill, save/cancel, assignee dropdown.
- **Delete Task** – Confirmation modal, cancel/confirm actions.
- **Role-Based Access Control** – Visibility of All Tasks menu, assign button, edit/delete permissions.
- **Alerts & Feedback** – Toast notifications (success/error), auto-dismiss, colors.
- **Local Storage** – Data persistence after refresh, correct data structure.
- **Responsive Design** – Tablet and mobile layouts, modal adaptability.

Out of scope: Performance testing, security testing beyond basic access control, cross-browser testing (only Chrome was used).

---

3. Test Environment

- **Browser:** Google Chrome (Version 120.0.6099.216)

- **Device:** Windows 11 Pro, 16GB RAM
- **Screen Resolutions Tested:** 1920×1080 (desktop), 768×1024 (tablet), 375×667 (mobile)
- **Tools:** Chrome DevTools for responsive testing and local storage inspection.

---

4. Test Execution Summary

A total of **50 test cases** were executed. All tests passed with no failures. The execution was performed by one QA engineer over two days.

Metric	Value
Total Test Cases	50
Passed	50
Failed	0
Blocked	0
Not Executed	0
Pass Rate	**100%**

---

5. Detailed Test Results by Category

Test Category	Total Tests	Passed	Failed	Pass Rate
Login & Authentication	7	7	0	100%
Dashboard Layout	6	6	0	100%
Task Table UI	8	8	0	100%

Test Category	Total Tests	Passed	Failed	Pass Rate
Create/Edit Modal	7	7	0	100%
Delete Task	3	3	0	100%
Role-Based Access Control	4	4	0	100%
Alerts & Feedback	2	2	0	100%
Local Storage	3	3	0	100%
Responsive Design	3	3	0	100%

---

6. Defect Summary

No defects were found during this test cycle. All functionality works as expected according to the requirements. A few minor UI suggestions were noted (e.g., slightly increasing contrast on disabled buttons) but these do not affect functionality and can be considered for future enhancements.

---

7. Conclusion and Recommendations

The Task Management Web Application meets all specified requirements and demonstrates:

- Correct role-based access control (Admin vs. User)
- Full CRUD operations with validation and feedback
- Responsive design that adapts to mobile and tablet screens
- Persistent data storage using browser local storage

Based on the successful test results, the application is **ready for deployment** to production. It is recommended to:
